

# ENERGY SAVING COMPETITION 2018

05 Sep - 04 Nov 2018

The follow tips are to provide you with a competitive edge in the competition.

Start saving energy today!

1. Switch off electronics completely when not in use.
2. Unplug unused electronics.
3. Use a fan instead of an air-conditioner.
4. If you're using an air conditioner, set the temperature to 25°C or higher.
5. Turn off unnecessary lights.
6. Use natural lighting in day-time.
7. Enable the power management features in your electronics.
8. Use the common study rooms to utilize electricity collectively.
9. Use an electric power strip instead of plugging electronics directly into plugs.
10. Use electrical saving appliances, especially for residents with refrigerators in their rooms.
11. Do not charge electronics overnight.
12. Utilize your curtains to control your unit temperature.
